HINT: MAKE SURE YOUR NFC ANTENNA IS TURNED ON IN YOUR PHONE'S SETTINGS MENU.

FLirt FLashes give you instantly Sexy, flirty eyes with easy lashes that go on in a flash!!

Ready to get noticed? Here is how it works:

*FLASHES WILL TURN YOU INTO THE WORLDS BIGGEST FLIRT!!

step 1

ROLL

For your first time, Flashes needs to be primed. Roll forward a few times until lashes begin to appear. Once the lashes appear and you are ready to apply, make sure the red line is near the bottom of the window.

Note: You will start seeing count-down numbers when you get to the last 10 lashes.

step 2

LOCK

When the lash is exposed half way, press the top button to click closed and hold lashes in place.

step 3

GLUE

Brush a thin layer of lash adhesive evenly on the end of the lash buds, taking care to avoid putting glue on the applicator. We recommend DUO Brush On Adhesive. Blow gently and wait 20-30 seconds for adhesive to get tacky.

Caution: Apply adhesive only to false lashes; do not brush directly onto your lashline.

step 4

APPLY

Apply lashes by gently touching the ends of the lashes to your lashline.

Pro Flirt Tip—to get a perfect placement, stretch the upper eyelid by gently pulling skin taut at the outer corner.

Hold the false lashes in place with Flashes for 3-5 seconds.

Caution: Avoid contact of false lashes or applicator directly into the eye.

step 5

RELEASE

Press the bottom button to release false lashes.

Voilaaaaa!!!
Full, Natural-Looking Flirty False Lashes in a FLash!

You can completely customize your lash look by applying as many or as few lashes as you want to.

Some Flirts love the look of just a few at the outer corners. Major Flirts go for an eye full, about four buds should cover it.

To remove lashes, use waterproof eye-makeup remover, then wash face as normal.
